PHOENIX, AZ 85007

Dear Irrigation Grandfathered Right Holder:

Enclosed is an OFFICIAL NOTICE of your agricultural conservation requirements for the third management period. These conservation requirements are effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the conservation requirements established for your Irrigation Grandfathered Right in the Fourth Management Plan. **PLEASE CAREFULLY REVIEW THIS LETTER AND THE ENCLOSED NOTICE.**

The Director of the Arizona Department of Water Resources ("Director") adopted the Third Management Plan ("TMP") for the Prescott Active Management Area ("AMA") in December of 1999. As originally adopted, the TMP did not contain a Base Agricultural Conservation Program with new irrigation water duties and maximum annual groundwater allotments for farms in the AMA because of questions regarding the appropriate irrigation efficiency to use when calculating the water duties. This issue was resolved in 2002 when the Legislature enacted legislation requiring the Director to calculate the irrigation water duties for most farms in the AMA using an assigned irrigation efficiency of 80 percent. A lower assigned irrigation efficiency may be used for farms determined by the Director to have limiting soils or excessive slopes and for farms where orchard crops were historically grown and continue to be grown. The legislation also requires the Director to modify the TMP to include a Best Management Practices ("BMP") Program as an alternative to the Base Program.

In April of 2003, the Director adopted modifications to Chapter 4 of the TMP to comply with the legislation enacted in 2002. The modifications include the addition of a Base Program with irrigation water duties calculated in the manner required by the legislation and the addition of a BMP Program. The Historic Cropping Program, an alternative program that was included in the TMP as adopted in 1999, was retained in the modifications. The purpose of this notice is to inform you of the water duties and allotments established for your farm and of the availability of the alternative programs. The official language of the modification to Chapter 4 may be reviewed at the Department's website, www.water.az.gov.

I. Base Agricultural Conservation Program Water Duties and Allotments

The irrigation water duty and maximum annual groundwater allotment adopted for your farm for the Base Program are set forth in the enclosed "Notice of Irrigation Water Duty and Maximum Annual Groundwater Allotment." You must comply with the water duty and annual allotment unless you apply for and are accepted for regulation under one of the alternative agricultural conservation programs described below.

FCTL003008

II. Alternative Agricultural Conservation Programs

There are two conservation programs available to you as alternatives to the Base Program: the BMP Program and the Historic Cropping Program. The BMP Program requires the implementation of specific agricultural conservation practices on the farm in lieu of complying with a water duty and annual allotment. Under the Historic Cropping program, the Director will calculate the water duty and annual allotment using an assigned irrigation efficiency of 75 percent. If a farm has limiting soils, the Director may use an assigned irrigation efficiency of 70 percent. Use of flex account provisions is limited under the Historic Cropping Program. An individual who wishes to be regulated under one of these alternative programs must apply on a form prescribed and furnished by the Director. The Director must approve the application before the individual can be regulated under the program.

The Director has found the Base Program irrigation water duties and maximum annual groundwater allotments established in the modifications to Chapter 4 of the TMP to be achievable for most Irrigation Grandfathered Right holders. However, there are two separate methods for seeking administrative relief from the water duty and annual allotment established for your farm if you believe you will be unable to comply with them. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a new conservation requirement may apply to the Director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The Director may grant a variance for up to five years upon a showing of "compelling economic circumstances."
AN APPLICATION FOR A VARIANCE MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A).
AN APPLICATION FOR AN ADMINISTRATIVE REVIEW UNDER A.R.S. § 45-575(A) MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.
An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement.

If you have any questions regarding your conservation requirements, or if you need an application form and information on one of the alternative conservation programs or on the variance and administrative review procedure, please contact the Prescott AMA office at (928) 778-7202

Sincerely,

s/Herbert R. Guenther

Herbert R. Guenther
Director

FCTL003009

**ARIZONA DEPARTMENT OF WATER RESOURCES
PRESCOTT ACTIVE MANAGEMENT AREA**

**NOTICE OF IRRIGATION WATER DUTY
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to A.R.S. § 45-572(B), the Director of the Arizona Department of Water Resources hereby gives notice of the irrigation water duty and maximum annual groundwater allotment established for the Irrigation Grandfathered Right listed below in the Third Management Plan for the Prescott Active Management Area.

The water duty and annual allotment shall become effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the water duty and annual allotment established for the Irrigation Grandfathered Right in the Fourth Management Plan. The owner of the Irrigation Grandfathered Right and any person using groundwater pursuant to the right must comply with the water duty and annual allotment while regulated under the Base Agricultural Conservation Program in the Third Management Plan.

IRRIGATION GRANDFATHERED RIGHT NO. 58-107000.0001

ASSIGNED IRRIGATION EFFICIENCY: 75 PERCENT

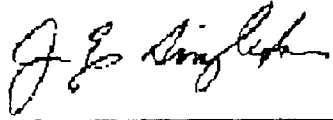

IRRIGATION WATER DUTY: 2.29 ACRE-FEET PER ACRE

**MAXIMUM ANNUAL
GROUNDWATER ALLOTMENT: 214.12 ACRE-FEET PER YEAR**

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced Irrigation Grandfathered Right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided by A.R.S. 45-467, the flexibility account provision. The annual allotment is calculated by multiplying the water duty for the Irrigation Grandfathered Right by the number of water duty acres associated with the right.

CERTIFICATE OF MAILING

I certify that on this 9th day of June, 2003, a copy of the attached letter and notice were sent by first-class mail to the addressee shown on the letter at the address shown on the letter.

A handwritten signature in cursive script, appearing to read "Joe Singleton", is written above a horizontal line.

Read all instructions before filling out form.

Filing Fee: \$20

1. STATE OF ARIZONA - STATE LAND DEPARTMENT

Last Name First Middle or Initial

Last Name First Middle or Initial

1624 WEST ADAMS PHOENIX ARIZONA 85007
Mailing Address City State Zip

NOTE: This form is to be filled out only for acres which you own. If you lease farm land, make sure that the owner of the leased land or his authorized agent is aware of the requirement to file for that land.

2. Legal description of all land presently owned by applicant in the Active Management Area which was legally irrigated at any time between January 1, 1975 and January 1, 1980.

All of Section 16, T16N, R2W, Except for the following: W $\frac{1}{2}$ W $\frac{1}{2}$; SE $\frac{1}{4}$ SE $\frac{1}{4}$; 990 ft. X
990 ft. parcel in NE $\frac{1}{4}$ NE $\frac{1}{4}$, Yavapai County, Arizona. 1/

3. Total number of acres in Item 2: 417.5 1/

4. Describe the location of each well used to irrigate the land. Indicate as accurately as possible the year the well was drilled.

NE $\frac{1}{4}$, NE $\frac{1}{4}$, NW $\frac{1}{4}$, Section 21 Township 16N Range 2W Year 1947
____ $\frac{1}{4}$, ____ $\frac{1}{4}$, ____ $\frac{1}{4}$, Section _____ Township _____ Range _____ Year _____
____ $\frac{1}{4}$, ____ $\frac{1}{4}$, ____ $\frac{1}{4}$, Section _____ Township _____ Range _____ Year _____
____ $\frac{1}{4}$, ____ $\frac{1}{4}$, ____ $\frac{1}{4}$, Section _____ Township _____ Range _____ Year _____

5. Is the land served by an irrigation district, agricultural improvement district or irrigation water delivery district? _____ Yes X No

If so, give name of district and point of diversion:

6. Is groundwater the sole source of water? X Yes _____ No

7. If water sources other than groundwater are used, indicate the basis on which those supplies are available to you; for example: court decree, delivery contract, surface water appropriation, contract for sewage effluent, etc. Be as specific as possible. **NOT APPLICABLE**

1/ Parts of the preceding legal description, as more completely illustrated in Item 13
and Attachment "B", were cultivated during the requisite time frame. The entire
parcel is under Agricultural Lease # 03-33073.

FCTL003014

8. Have you owned the land since January 1, 1975? ☒ Yes _____ No. If not, list below the name and address of the previous owner of the land and the date of purchase.

9. Indicate the crops grown, the number of acres planted in each crop and the total number of acres planted in each year. **Do not count double cropped acres twice in the last column.** Indicate irrigation methods used for each crop for 1979 only.

	crops grown	# acres in crop	irrigation method	total # acres planted
1979	None			
1978	None			
1977	Winter Wheat	96		96
1976	Corn, Milo	40		40
1975	None			

If additional space is needed, attach additional sheet of paper

10. Indicate the amount of water used from each source in each of the five years (acre-feet).

	1975	1976	1977	1978	1979
groundwater	-0-	267	640	-0-	-0-
surface water					
sewage effluent					

The above amounts are ☐ measured ☒ estimated. See instructions for documentation requirements.

COMMENTS: See Attachment "A"

11. Do you make use of any of the following?

	Yes	No		
Lined ditches or pipes	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Percentage of ditches lined	-0-
Pump-back system	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Number of acres served	
Land levelling	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Number of acres levelled	
Other	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Number of acres affected	

COMMENTS: Irrigation water was delivered via unlined ditches laid out along the natural contours of the farm unit.

12. Indicate the source of the data included in this application. (All sources must be available for inspection by the Department.)

- ☐ Agricultural Stabilization and Conservation Service (ASCS)
 ☒ Farm Records
 ☒ Other
 ☐ Irrigation District Records
 ☐ County Agent Records

If other is checked, please identify the source of the data. Person communication from David Rees, farm operator from 1975 - 1978. Information on farm efficiencies and crop water requirements were obtained from the S.C.S. office in Prescott.

FCTL003015

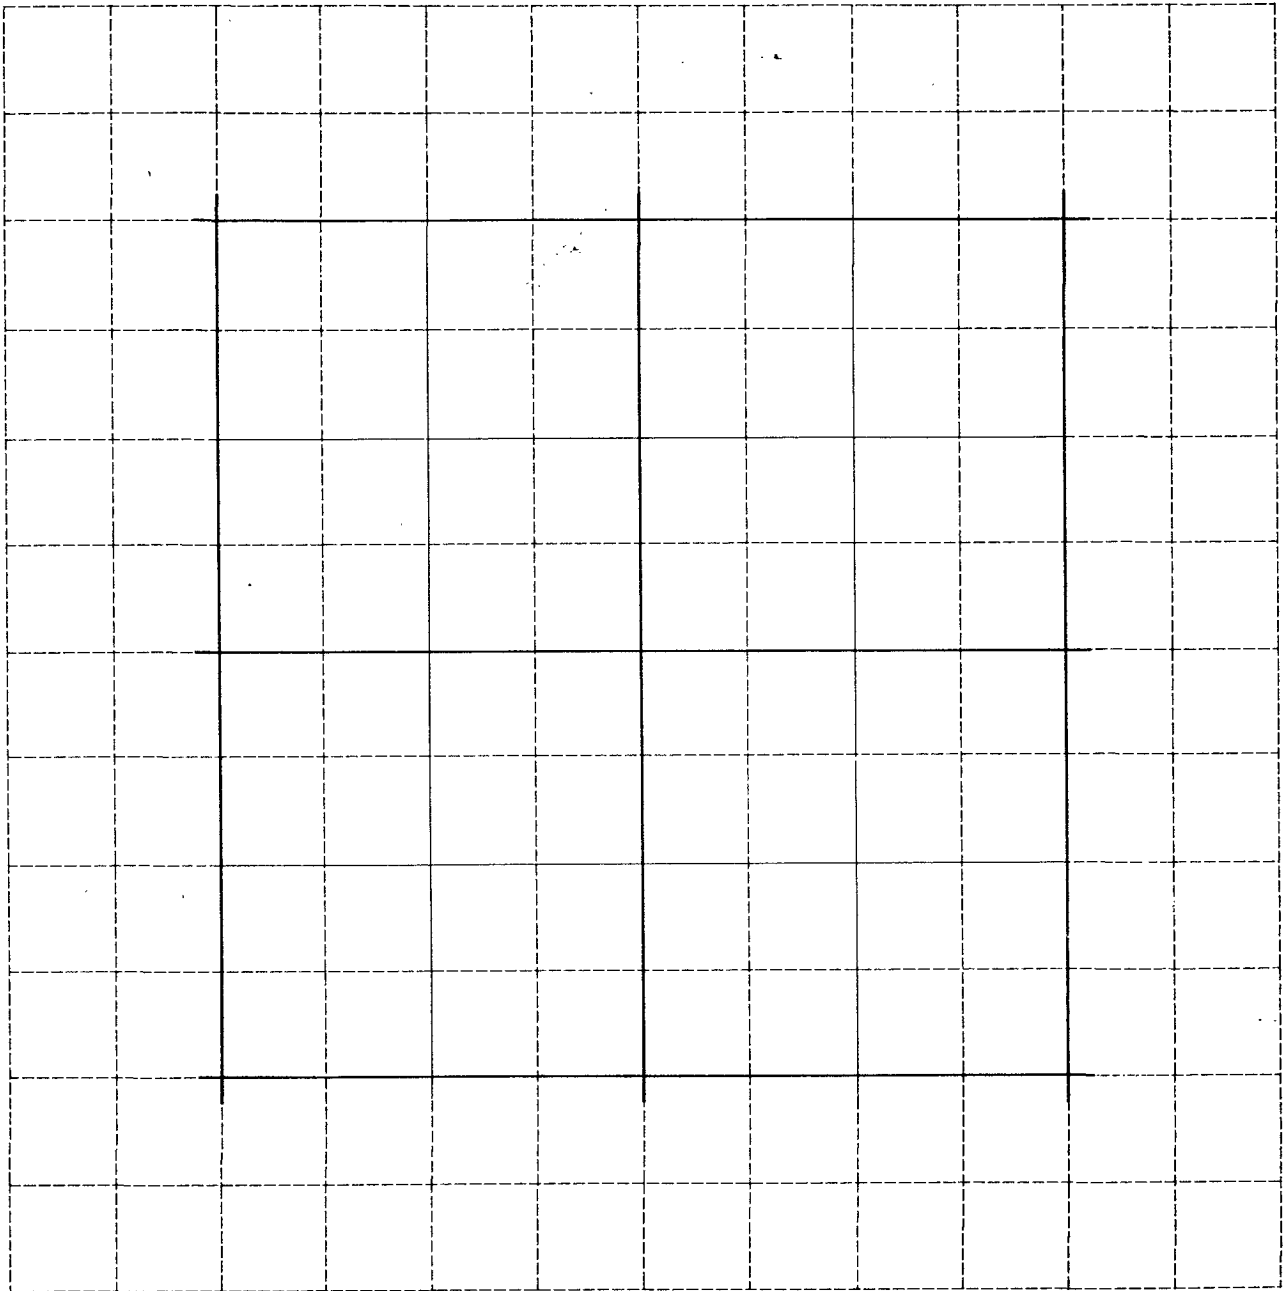

13. On the grid below, draw a map of the land described in Item 2 and indicate the location of the wells described in Item 4. Indicate the scale of the map in the space below.

IRRIGATION GRANDFATHERED WATER RIGHTS

ATTACHMENT A.

DOCUMENTATION OF WATER USE ESTIMATES FOR ITEM 10

The water use estimates listed under Item 10 are based on the data, coefficients and assumptions listed below.

I. EQUATION

$$W_c = \frac{I_r}{E_f}$$

where: $I_r = C_u + I_f$

$I_f = I_p + L_p$

and: W_c = Total Water Used by Crop (ac.ft/ac)

I_r = Irrigation requirements (ac.ft/ac)

E_f = Farm efficiency (%)

C_u = Consumptive Use of Crop (ac.ft/ac)

I_f = Field Preparation Irrigation factor
(ac.ft/ac)

I_p = Pre-irrigation requirement (ac.ft/ac)

L_r = Leaching requirement (ac.ft/ac)

Where leaching and pre-irrigation are done in the same operation the reported amount is used as I_f , otherwise the two figures (I_p and L_r) are considered separately. In lieu of exact figures the estimated amounts given below are used.

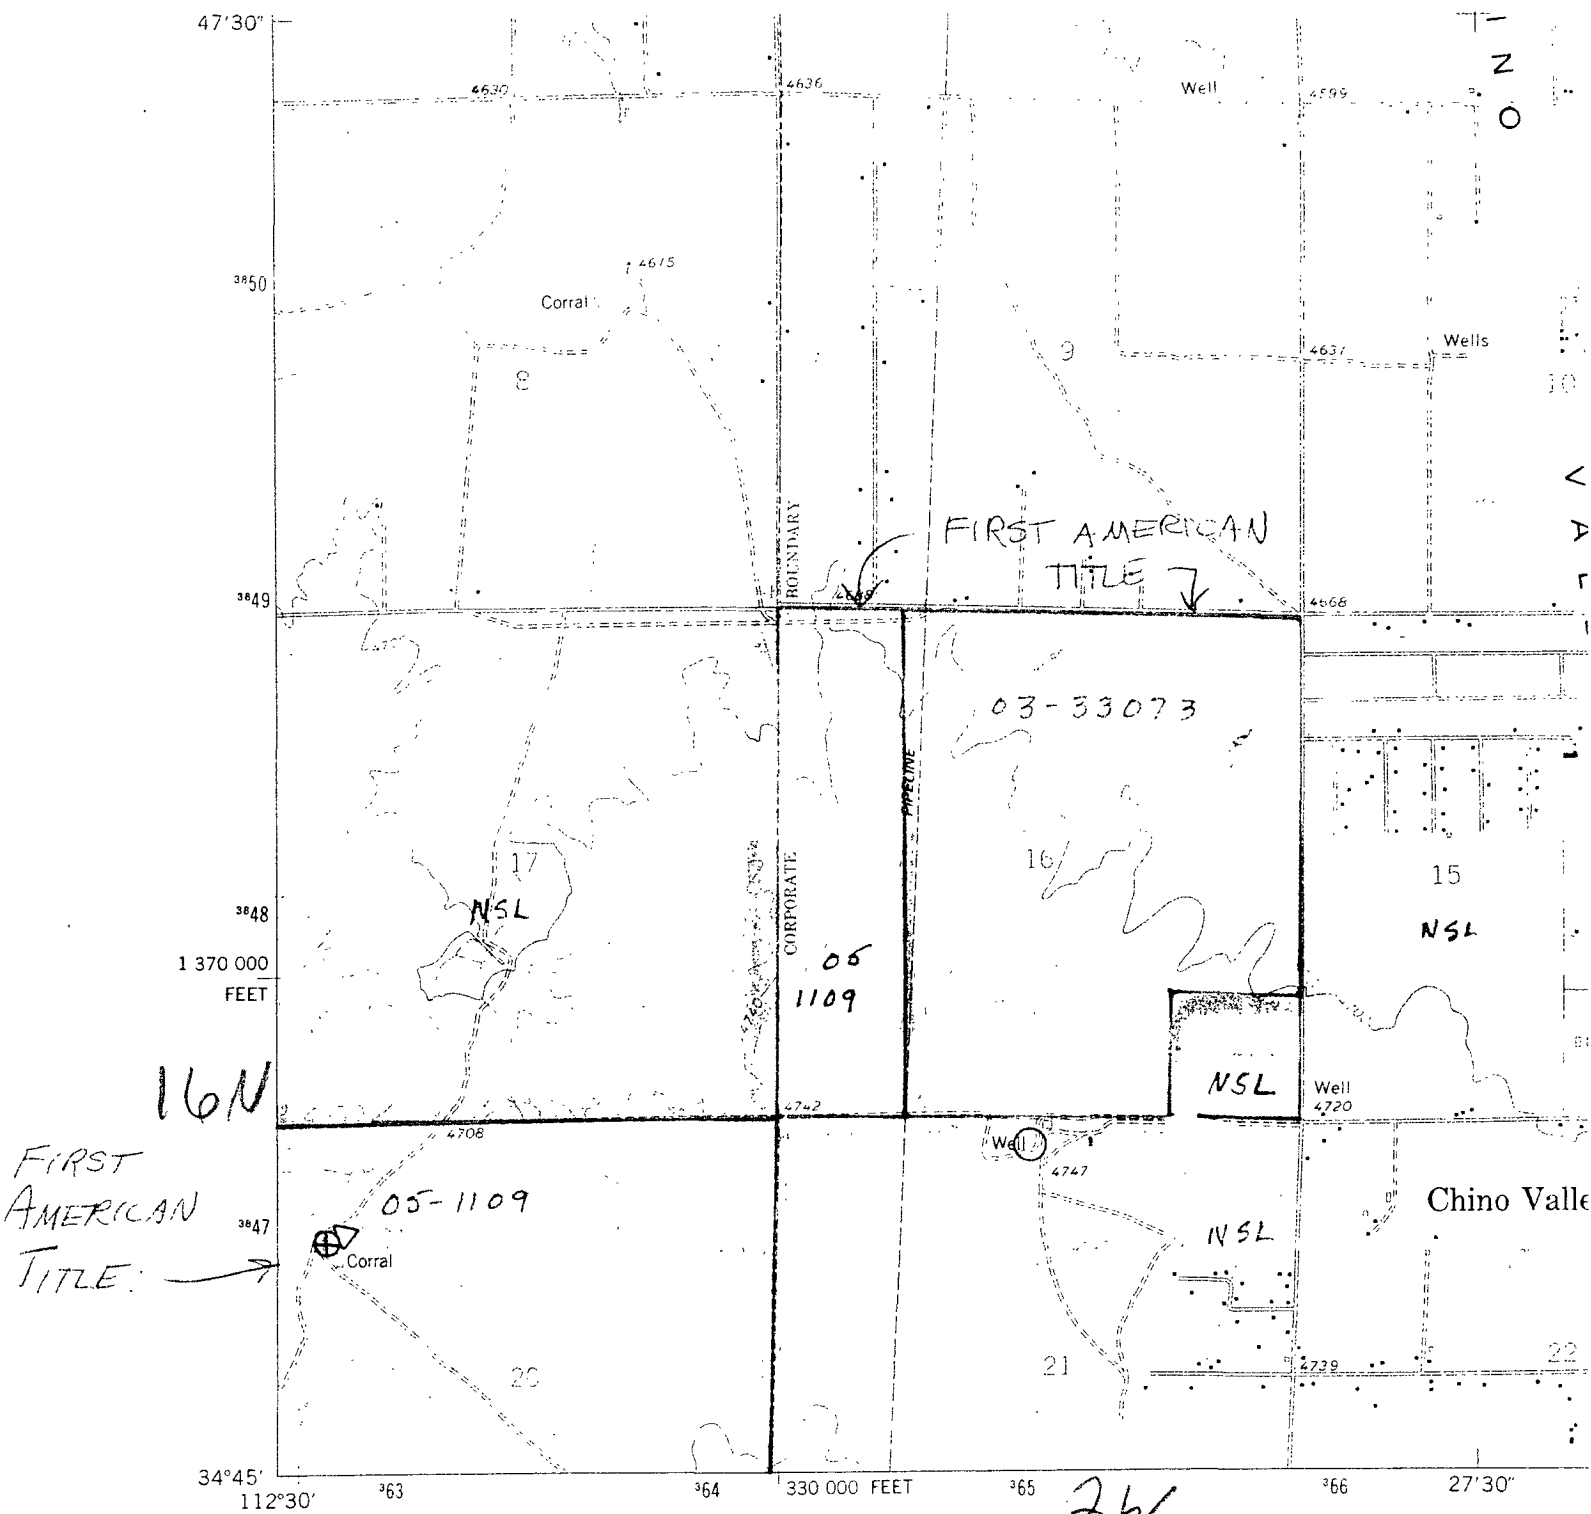

FCTL003018

- II. Efficiency Factor (E_f) is an estimated numerical component based on the judgement of the field investigator. Although subjective, the estimates are based upon: (1) comparison with farms, both in good and bad condition, whose efficiencies have been determined by the Soil Conservation Service (SCS); (2) the current condition of the water related improvements (i.e., the degree of leveling, % lined ditches and pipes, pumpbacks, farm upkeep, etc.); (3) general description of soil type (with special attention paid to potential transmission loss and alkalinity); (4) management factors including Irrigation Timing, length of run, etc. and evaporative losses.

Comparison of E_f estimates with those previously calculated by the SCS show a relatively good correlation, although as of this date the ASLD does not have enough hard data to generate exact E_f values using the SCS computer program. At present values will range from a low end of 40% for grade leveled fields with sandy soils, no pumpback, and an average run of ½ mile or more to a high of 80% for dead leveled fields with a ditch recirculation system, fine grained soils, and an average irrigation run of ¼ mile or less.

- III. Estimated Consumptive Use (C_u) is obtained from Technical Bulletin 169 of the University of Arizona Agricultural Extension Service and assorted Agri-File irrigation bulletins modified for general conditions of each Arizona County.
- IV. Pre-Irrigation Requirement (I_p) varies with management practices, soil types and past cropping history. Not all farms use this practice however discussion with farmers and SCS personnel indicate that 0.5 ac.ft/ac is an average figure for pre-irrigation when used.
- V. Leaching Requirement (L_r) will vary with the practices of the individual farmer and by the necessities of soil type and water quality. Many, but not all, farms in the western sections of Pinal County have moderately alkaline soils and high TDS water. To account for the necessity to leach soluble minerals out of the root zone we have used a factor of 0.5 ac.ft/ac for the leaching requirement, although it may not be needed every year for each variety of crop.
- VI. Water Delivery Estimate by crop: For each crop planted on a farm the total water used by the crop (W_c) is calculated and multiplied by the number of acres planted in that crop. These figures are then summed to provide the total water consumed by the farm for irrigation purposes.

The above formulas are derived for the estimation of water application. It should in no way be interpreted as a final (or exact) calculation of crop consumptive use. It is simply a method of providing an estimate at this time given the present availability of data. The ASLD expects to be able to provide a more exact method of estimating W_c with the continuation of our field investigation and data collection program.

Certificate Of Grandfathered Groundwater Right

COUNTY OF YAVAPAI

STATE OF ARIZONA DEPARTMENT OF WATER RESOURCES

*This is to certify that pursuant to the provisions of
Title 45, Chapter 2, Arizona Revised Statutes*

STATE OF ARIZONA
STATE LAND DEPARTMENT
1624 W. ADAMS
PHOENIX, ARIZONA 85007

is granted
IRRIGATION GRANDFATHERED RIGHTS
in the

PRESOTT ACTIVE MANAGEMENT AREA

for 144.7 irrigation acres of land. The rights are appurtenant to and groundwater may be used only on the irrigation acres of land described as follows:

Portions of S $\frac{1}{2}$, NE $\frac{1}{4}$; E $\frac{1}{2}$, SW $\frac{1}{4}$; W $\frac{1}{2}$, SE $\frac{1}{4}$; NE $\frac{1}{4}$, SE $\frac{1}{4}$; SE $\frac{1}{4}$, SE $\frac{1}{4}$, NW $\frac{1}{4}$,
Section 16, Township 16 North, Range 2 West of the Gila and
Salt River Base and Meridian as shown on Exhibit "A" attached
hereto and made a part hereof by reference.

The use of groundwater on the above described land shall be for irrigation purposes in accordance with the laws of the State of Arizona and restrictions placed on use by the Director of the Department of Water Resources pursuant to Title 45, Chapter 2, Arizona Revised Statutes.

CERTIFICATE NO. 58-107000

is granted this 7th day of February, 1983

ARIZONA DEPARTMENT OF WATER RESOURCES

Wesley E. Sterner

Director

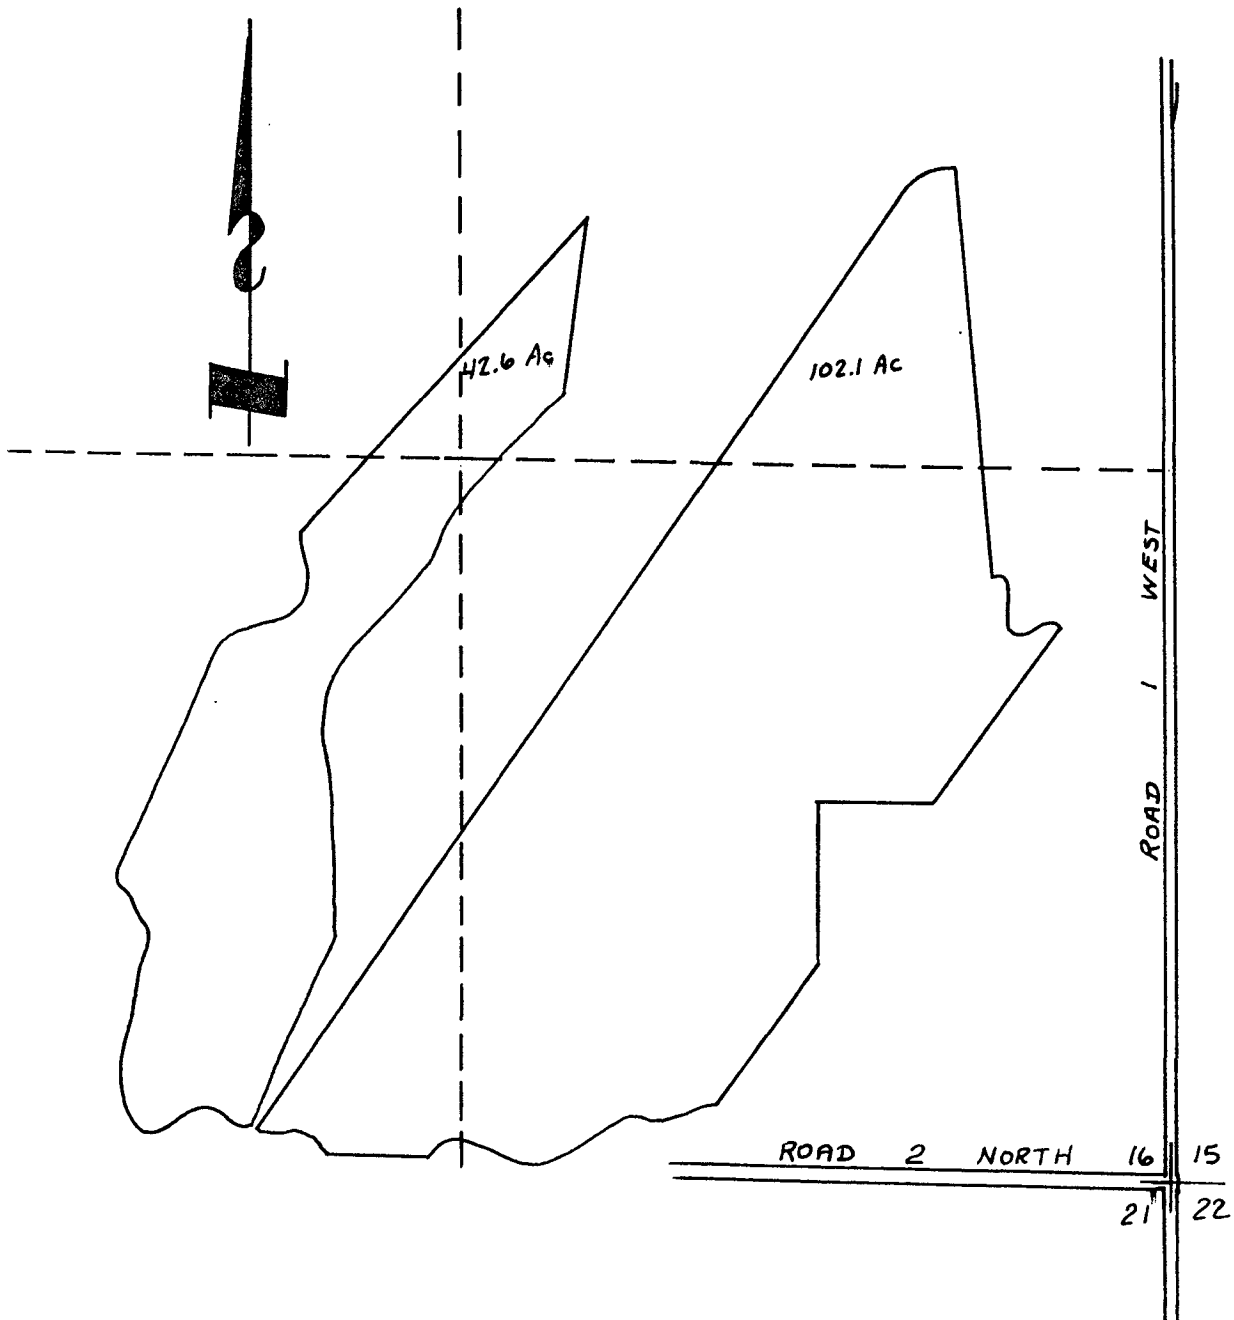

The Department of Water Resources must be notified if the above named person(s) changes his address, conveys ownership of the land to another person(s), or wishes to convert the right to a non-irrigation grandfathered right associated with retired irrigated land.

Re: Irrigation Certificate Of Grandfathered Groundwater Right No.
58-107000.0000

Dear Jim:

This letter is a follow-up to our telephone conversation of July 20, 1995, regarding the above Certificate of Grandfathered Groundwater Right.

As I indicated, the Arizona State Land Department has sold 50 acres of land located in Section 16, Township 16 North, Range 2 West. Approximately 11 acres out of those 50 are irrigation acres and are part of the Irrigation Grandfathered Groundwater Right referenced. This land was sold to Happy Valley Road, Inc. under Patent 53-53806.01 (enclosed), which describes the real property in detail.

The Land Department is hereby requesting that our new grandfathered right (58-107000.0001) reflect the change in the irrigation acres from 144.7 to 133.7.

I am also enclosing the Companion Transaction Entry/Transfer for \$35.00 along with the original Certificate and maps, as well as the Notification of Change in Legal Ownership and Conveyance of a Certificate of Irrigation Grandfathered Right and Change of Well Ownership.

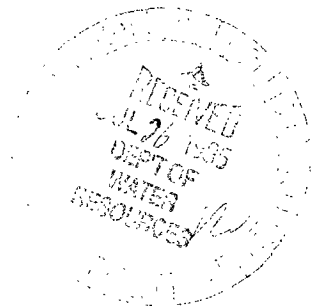

If you have any questions, please call me at (602) 542-3500. Thank you.

Sincerely,

Glenn Pitts

PHOENIX , AZ 85007

Dear Irrigation Grandfathered Rightholder:

Enclosed is an OFFICAL NOTICE of your final agricultural conservation requirements for the second management period. These requirements will become effective on January 1, 2000.

PLEASE CAREFULLY REVIEW THE ENCLOSED REQUIREMENTS.

In December of 1989, the Director of the Arizona Department of Water Resources ("Director") adopted the Second Management Plan (SMP) for the Prescott Active Management Area (AMA). The SMP was adopted in accordance with Arizona's Groundwater Code, which requires the Director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA.

For irrigation grandfathered rightholders, the Groundwater Code mandates the establishment of new irrigation water duties to be reached by the end of the second management period, and authorizes the Director to establish intermediate water duties to be reached at specified intervals during the second management period. The Groundwater Code provides that a farm's irrigation water duty must be calculated as the quantity of water reasonably required to irrigate the crops historically grown in the farm unit, and must assume maximum conservation consistent with prudent long-term farm management practices within areas of similar farming conditions, considering the time required to amortize conservation investments and financing costs. In addition, the Groundwater Code provides that the maximum annual groundwater allotment is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision.

Irrigation grandfathered rightholders were first given written notice of their intermediate and final irrigation water duties and maximum annual groundwater allotments for the second management period within thirty days after the SMP was adopted. Additional written notice of the second intermediate irrigation water duties and maximum annual groundwater allotments was given in late 1992.

The enclosed notice is being sent to you to give you additional notice of the final irrigation water duty and maximum annual groundwater allotment for your farm, which will become effective on January 1, 2000. The final water duty and allotment set forth in this notices reflect any adjustments which may have been granted pursuant to an administrative review request filed following the original notification of the SMP conservation requirements.

FCTL003038

The final SMP water duty and allotment will remain in effect until the first compliance date for the irrigation water duties and maximum annual groundwater allotments established for your farm in the Third Management Plan (TMP). The Arizona Department of Water Resources ("Department") is currently in the process of developing the TMP conservation requirements. You will be notified of those requirements within thirty days after the TMP is adopted.

VARIANCE

The Department considers the final irrigation water duties and maximum annual groundwater allotments established in the SMP to be achievable by most farms by the year 2000. However, if you believe you will need additional time to comply with the final water duty and allotment established for your farm, you may apply for a variance from the water duty and allotment.

A variance from a final water duty and allotment may be granted for up to five years if there are "compelling economic circumstances" preventing timely compliance with the water duty and allotment. In order to obtain a variance, an applicant must prove that the applicant's economic circumstances prevent compliance with the final water duty and allotment by the year 2000. In determining whether to grant a variance, the Department will take into consideration the applicant's flexibility account balance. Any decision made on the application will be appealable to the Office of Administrative Hearings.

IF YOU WISH TO APPLY FOR A VARIANCE FROM THE FINAL WATER DUTY AND ALLOTMENT YOU MUST SUBMIT A COMPLETED VARIANCE APPLICATION FORM TO THE DEPARTMENT WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE. Application forms and information on the variance procedure are available at the Prescott office.

If you have any questions regarding your conservation requirements or if you need an application form and information on the variance procedure, please contact the Prescott AMA at (520) 778-7202.

Sincerely,

A handwritten signature in black ink, appearing to read "Rita P. Pearson". The signature is fluid and cursive, with the first name "Rita" being more prominent.

STATE OF ARIZONA
DEPARTMENT OF WATER RESOURCES
PRESCOTT ACTIVE MANAGEMENT AREA

**NOTICE OF FINAL IRRIGATION WATER DUTY
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to Arizona Revised Statutes (A.R.S.) § 45-565(C), the Director of the Arizona Department of Water Resources hereby gives additional notice of the final irrigation water duty and maximum annual groundwater allotment for the Second Management Period for:

IRRIGATION GRANDFATHERED RIGHT CERTIFICATE NO. 58-107000.0001

The following is the final irrigation water duty and maximum annual groundwater allotment for the above-referenced irrigation grandfathered right. The water duty and allotment shall become effective beginning in calendar year 2000, and shall remain in effect until the first compliance date of the water duties and maximum annual groundwater allotments established for the irrigation grandfathered right in the Third Management Plan.

IRRIGATION WATER DUTY:	2.29	ACRE-FEET PER ACRE
MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:	214.11	ACRE-FEET PER YEAR

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced irrigation grandfathered right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision. The maximum annual groundwater allotment is calculated by multiplying the final irrigation water duty for the irrigation grandfathered right by the number of water duty acres associated with the irrigation grandfathered right. You were previously noticed of these requirements.

*This is to certify that pursuant to the provisions of
Title 45, Chapter 2, Arizona Revised Statutes*

State of Arizona

State Land Department

1616 West Adams

Phoenix, Arizona 85007

is granted

IRRIGATION GRANDFATHERED RIGHTS

in the

PRESCOTT ACTIVE MANAGEMENT AREA

for **132.51** irrigation acres of land. The rights are appurtenant to and groundwater may be used only on the irrigation acres of land described as follows:

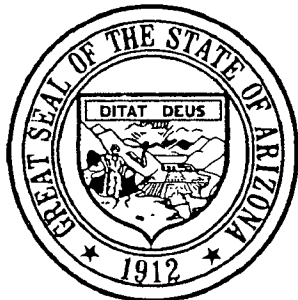

E $\frac{1}{2}$ W $\frac{1}{2}$, W $\frac{1}{2}$ E $\frac{1}{2}$, W $\frac{1}{2}$ W $\frac{1}{2}$ NE $\frac{1}{4}$ NE $\frac{1}{4}$ and NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 16 T16N R2W GSRB&M, excluding all dedicated rights of way and non-irrigated areas as more fully described in the map attached hereto as Exhibit A and made a part hereof by reference.

The use of groundwater on the above described land shall be for irrigation purposes in accordance with the laws of the State of Arizona and restrictions placed on use by the Director of the Department of Water Resources pursuant to Title 45, Chapter 2, Arizona Revised Statutes.

CERTIFICATE NO. 58-107000.0001

is granted this 16th day of May, 1996

ARIZONA DEPARTMENT OF WATER RESOURCES

Phil L. Foster

Director, Prescott Active Management Area

The Department of Water Resources must be notified if the above named person(s) makes an address change, conveys ownership of the right to another person(s) or wishes to convert the right to a non-irrigation grandfathered right associated with retired irrigated land.

FCTL003042

**ARIZONA DEPARTMENT OF WATER RESOURCES
PRESCOTT ACTIVE MANAGEMENT AREA**

**NOTICE OF IRRIGATION WATER DUTY
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to A.R.S. 45-565.B., the Director of the Department of Water Resources hereby gives notice of irrigation water duties and the maximum annual groundwater allotments for Irrigation Grandfathered Right Certificate No. 58-107000.0001 for the Second Management Period, 1990 to 2000. The irrigation water duty is the amount of water in acre feet per acre that is reasonable to apply to irrigated land in a farm unit during the accounting period. The maximum annual groundwater allotment is the maximum amount of water that may be used to irrigate the above referenced Grandfathered Right, except as provided in A.R.S. 45-467, the flexibility account provision.

In accordance with A.R.S. 45-565.A.1., the Department has established two intermediate water duties, two intermediate maximum annual groundwater allotments, one final water duty and one final maximum annual groundwater allotment as follows:

Beginning calendar year 1992 and for each calendar year through calendar year 1994:

IRRIGATION WATER DUTY: 3.44 ACRE FEET PER ACRE.

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: 321.64 ACRE FEET.

Beginning calendar year 1995 and for each calendar year through calendar year 1999:

IRRIGATION WATER DUTY: 3.44 ACRE FEET PER ACRE.

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: 321.64 ACRE FEET.

Beginning calendar year 2000 and for each calendar year until the first compliance date of any Third Management Plan requirement:

IRRIGATION WATER DUTY: 2.29 ACRE FEET PER ACRE.

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: 214.11 ACRE FEET.

Attachment A to this notice sets forth the official language of the above requirements for holders of irrigation grandfathered rights as adopted in the Second Management Plan for the PRESCOTT Active Management Area. Attachment A is incorporated into this notice by reference. Compliance with the irrigation water duty and maximum annual groundwater allotment for each period must be achieved by the above respective dates, and must be maintained until the specified dates above.

Fax (602) 417-2415

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

Dear Grandfathered Right Holder:

Enclosed is your Certificate of Grandfathered Groundwater Right. The Certificate identifies the number of acres in your farm that may be irrigated with groundwater and the location of those acres. It is an important document and substantially affects the value of your land.

Also enclosed is your Notice of Irrigation Water Duty and Maximum Annual Groundwater Allotment for the Second Management Period (1990-2000). Irrigation water duties and maximum annual groundwater allotments for holders of irrigation grandfathered rights in the Prescott Active Management Area became effective January 1, 1987 as part of the First Management Plan for the Prescott Active Management Area. The management plans also specify mandatory water conservation requirements for municipal and industrial water users.

Please take the time to review the enclosed Notice. Of special importance is the maximum annual groundwater allotment. This allotment is the maximum amount of groundwater that may be used to irrigate the acres described on your Certificate of Grandfathered Groundwater Right, except as provided by the flexibility account provision explained below.

To be in compliance, your water measurement data for each calendar year must indicate that you have not exceeded your maximum annual groundwater allotment--unless you borrowed from your flexibility account. You must remain in compliance with the allotment until the effective date of any new irrigation water duty and maximum annual groundwater allotment established in the Second Management Plan for the Prescott Active Management Area.

Because variations in market conditions, weather and other natural forces often affect agricultural water use, the Groundwater Code requires the Department to establish a flexibility account for each farm. The flexibility account permits farmers to "borrow or bank" groundwater from year to year. Flexibility accounts went into effect on January 1, 1987.

If a farmer uses less than a farm's maximum annual groundwater allotment, the Department will register a credit to the farm's flexibility account. If a farmer uses more than a farm's maximum annual groundwater allotment, the Department will register a debit to the account. The Code limits the total amount a farmer may borrow from the flexibility account to 50% of the farm's maximum annual groundwater allotment. The Groundwater Code also establishes a special method for calculating credits and debits for farmers who use both surface water and groundwater. This package may also include a flexibility account statement.

Every reasonable effort has been made to ensure that the information contained in the Certificate and Notice is accurate. However, if an administrative or typographical error has been made on the Certificate or Notice, please notify the Groundwater Management Support Section within 30 days.

FCTL003044

Supporting information regarding your Certificate of Grandfathered Groundwater Right, including a map depicting the land to which the right is appurtenant, is on file at the Department and is available upon request. If your property includes any non-irrigated areas, a map is attached as an exhibit to your Certificate. Remember, only acres of land specifically identified on this Certificate may be irrigated. Also, the groundwater allotment identified on the enclosed Notice may be used only on the lands identified on the enclosed Certificate.

You are also reminded that the Department must be notified if the person named in the Certificate makes an address change, conveys ownership of all or a part of the land to another person or wishes to convert the irrigation right to a non-irrigation right. Forms and information relative to these matters are available from the Groundwater Management Support Section.

Questions or requests for information about the Certificate or Notice should be addressed to the Groundwater Management Support Section at (602) 417-2470.

FIRST NOTICE OF VIOLATION OF A.R.S. §45-632 FAILURE TO FILE AN ANNUAL REPORT

Records of the Department of Water Resources ("Department") indicate that you are responsible for filing an **Annual Water Withdrawal and Use Report** ("Annual Report") with this Department for the right or permit number listed above. Pursuant to Arizona Revised Statute ("A.R.S.") §45-632(O), the Annual Report must be filed no later than March 31 of each year for the preceding calendar year. According to our records, the Department has not received an Annual Report for calendar year 2001.

The penalty for failure to file the report is \$25.00 for each month or portion of a month that the report is delinquent. A.R.S. §45-632(O). After six months, failure to file an Annual Report may also subject you to enforcement action involving civil penalties.

If you did not withdraw any groundwater in 2001, you may avoid further accrual of late filing fees by filing your report by April 30, 2002, along with a late payment fee of \$25.00.

If you withdrew groundwater in 2001, you also are subject to statutory late payment fees of ten percent of the unpaid withdrawal fee for each month or a portion of a month that the fee is delinquent. A.R.S. §45-614(E). You may avoid further accrual of both late filing and late payment fees by filing your report by April 30, 2002, along with payment of the standard groundwater withdrawal fee of \$2.00 per acre foot, a late filing fee of \$25.00, a late payment fee of ten percent (10%) of the withdrawal fee, and the WQARF fees (if applicable).

If the water right has been sold, you must notify the Department. Please call the Prescott Active Management Area at (928) 778-7202 if you have questions or believe an error has been made.

STATE OF ARIZONA

STATE LAND DEPARTMENT

1616 W ADAMS

PHOENIX AZ 85007

Dear Irrigation Grandfathered Rightholder:

This is an OFFICIAL NOTICE that the director of the Arizona Department of Water Resources (director) has issued a final order adopting the management plan for the Prescott Active Management Area (AMA) for the third management period, 2000 to 2010. This is also an Official Notice of the irrigation water duty (water duty) and maximum annual groundwater allotment (annual allotment) established in the Third Management Plan (TMP) for your irrigation grandfathered right, which will become effective on January 1, 2002. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On December 13, 1999, the director issued a final order adopting the TMP. The TMP was adopted in accordance with Arizona's Groundwater Code (Code), which requires the director to establish a continuing mandatory conservation program for all persons withdrawing, distributing, or using groundwater within the AMA. The Code provides that the director shall establish a new irrigation water duty for each farm unit within the AMA, which shall be calculated as the quantity of water reasonably required to irrigate the crops historically grown in the farm unit, assuming maximum conservation consistent with prudent long-term farm management practices within areas of similar farming conditions, considering the time required to amortize conservation investments and financing costs.

The TMP includes water duties and annual allotments for Irrigation Grandfathered Rights in the AMA which must be complied with from January 1, 2002 until the effective date of any substitute water duty and annual allotment in the Fourth Management Plan. A farm's annual allotment was calculated by multiplying the farm's water duty by the number of water duty acres in the farm. The annual allotment is the maximum amount of groundwater that may be used in any year to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided in A.R.S. § 45-467, the flexibility account statute.

The water duty and annual allotment established for your Irrigation Grandfathered Right in the TMP are set forth in the enclosed notice. The water duty and allotment are identical to the final water duty and annual allotment established for your Irrigation Grandfathered Right in the Second Management Plan (SMP), and include any adjustments made to the final SMP water duty and annual allotment pursuant to an administrative review application, with the exception of any poor water quality adjustments. If you require an adjustment to your TMP water duty and allotment due to poor water quality, you must apply for an administrative review within 90 days after you receive this notice.

FCTL003057

You have the right to seek administrative relief from the conservation requirements established in the TMP. You also have the right to seek judicial review of the director's order adopting the TMP. The following is a description of your rights.

Administrative Relief

The director has found the conservation requirements in the TMP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances." An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). An application for administrative review under A.R.S. § 45-575(A) must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the third management period, please contact the Prescott AMA for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the director's order adopting the TMP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within thirty-five days after your receipt of this notice. You may review the entire TMP at the locations listed in Attachment B.

If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call the Prescott AMA at (520) 778-7202.

Sincerely,

Rita P. Pearson
Director

FCTL003058

**STATE OF ARIZONA
DEPARTMENT OF WATER RESOURCES**

PRESCOTT AMA ACTIVE MANAGEMENT AREA

**NOTICE OF IRRIGATION WATER DUTY AND MAXIMUM ANNUAL GROUNDWATER
ALLOTMENT FOR THE THIRD MANAGEMENT PERIOD, 2000 TO 2010**

Pursuant to A.R.S. § 45-566(B), the director of the Arizona Department of Water Resources (director) hereby gives notice of the irrigation water duty and maximum annual groundwater allotment established for:

**IRRIGATION GRANDFATHERED RIGHT
CERTIFICATE NUMBER 58-107000.0001**

in the management plan for the Prescott Active Management Area for the third management period, 2000 to 2010. The irrigation water duty is the amount of water in acre-feet per acre that is reasonable to apply to irrigated land in a farm unit during a calendar year. The irrigation water duty for the above-referenced Irrigation Grandfathered Right was calculated using the assigned irrigation efficiency set forth below. The maximum annual groundwater allotment is the maximum amount of groundwater that may be used to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided in A.R.S. § 45-467, the flexibility account statute.

Beginning calendar year 2002 and for each calendar year thereafter until the first compliance date for any substitute irrigation water duty and maximum annual groundwater allotment established in the Fourth Management Plan:

IRRIGATION WATER DUTY: 2.29 ACRE-FEET PER ACRE

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: 214.11 ACRE-FEET PER YEAR

ASSIGNED IRRIGATION EFFICIENCY: 75 PERCENT

Attachment A sets forth the conservation requirements for holders of irrigation grandfathered rights as adopted in the TMP. Attachment A is incorporated into this notice by reference.

October 1, 2001

To Whom It May Concern:

I would like to request that my late fees for water withdrawal report be waived for the year 2000. The reason for the delay was simply confusion within our office because of unfamiliarity. I am hand carrying this paperwork through DWR and State Land offices to rectify the problem and educate myself so not to have this problem in the future.

Sincerely,

Lon Turner

10/01/01

2000
CITATION

NOTICE OF VIOLATION OF ARIZONA REVISED STATUTES § 45-632
FAILURE TO FILE AN ANNUAL REPORT

THE ARIZONA DEPARTMENT OF WATER RESOURCES

TO THE RESPONDENT: STATE OF ARIZONA

RIGHT OR PERMIT NO: 58-107000.0001

The Groundwater Code, A.R.S. § 45-632, requires you to file an Annual Water Withdrawal and Use Report for the permit or right listed above for calendar year 2000. This report must be filed whether or not water was used. Your report was not filed by the statutory deadline of March 31, 2001.

You are hereby afforded an opportunity to avoid further sanctions by signing the agreement at the bottom of this document, preparing the enclosed Annual Report Form and returning these documents along with a late filing fee in the amount of \$150.00 and a civil penalty in the amount of \$250.00. If you withdrew groundwater, also submit a withdrawal fee of \$2.00 per acre foot, plus a late payment fee of 60% of the withdrawal fee (A.R.S. § 45-614(E)) and WQARF fees (if applicable).

FAILURE TO PAY THESE FEES MAY RESULT IN INCREASED PENALTIES.

If you comply with these terms and return your Annual Report, this agreement and payment by October 30, 2001, the Department of Water Resources will not take further enforcement proceedings on this violation.

If you have any question or require additional assistance, contact the Prescott Active Management Area office at (520) 778-7202.

I AGREE THAT THE FACTS STATED ABOVE ARE TRUE AND ENCLOSE THE 2000 ANNUAL REPORT AND ANY APPLICABLE WITHDRAWAL FEES, AS WELL AS PENALTIES OF \$250.00.

**RE: 1999 Annual Water Withdrawal and Use Report for Irrigation Grandfathered
Groundwater Right (GFR) No. 58-107000.0001.**

Dear Lessee:

Enclosed you will find the 1999 Annual Water Withdrawal and Use Report form for the above referenced GFR. As indicated on the letter sent to you on January 12, 2000, the deadline to file this report with the Department of water resources is on or before March 31, 2000.

Please complete this form and include the withdrawal fees associated with your annual withdrawal and use report.

If you have any questions, please contact me at (602) 542-3500. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read "Glenn Pitts".
